

Secure mobile data for police forces

Designed around police business processes, **Mobaq** is the benchmark for secure mobile data in UK policing.

Mobaq is firmly established, with a track record spanning a decade in many large UK police forces. As the market leader, our solution is proven, demonstrable, unique and referenceable.

Mobaq provides data access and entry to multiple back-office systems. An officer can retrieve information from national and local systems, re-use it in a range of forms and resubmit it into multiple systems.

Mobilisation of business processes delivers a range of organisational benefits as well as cashable and ongoing savings.

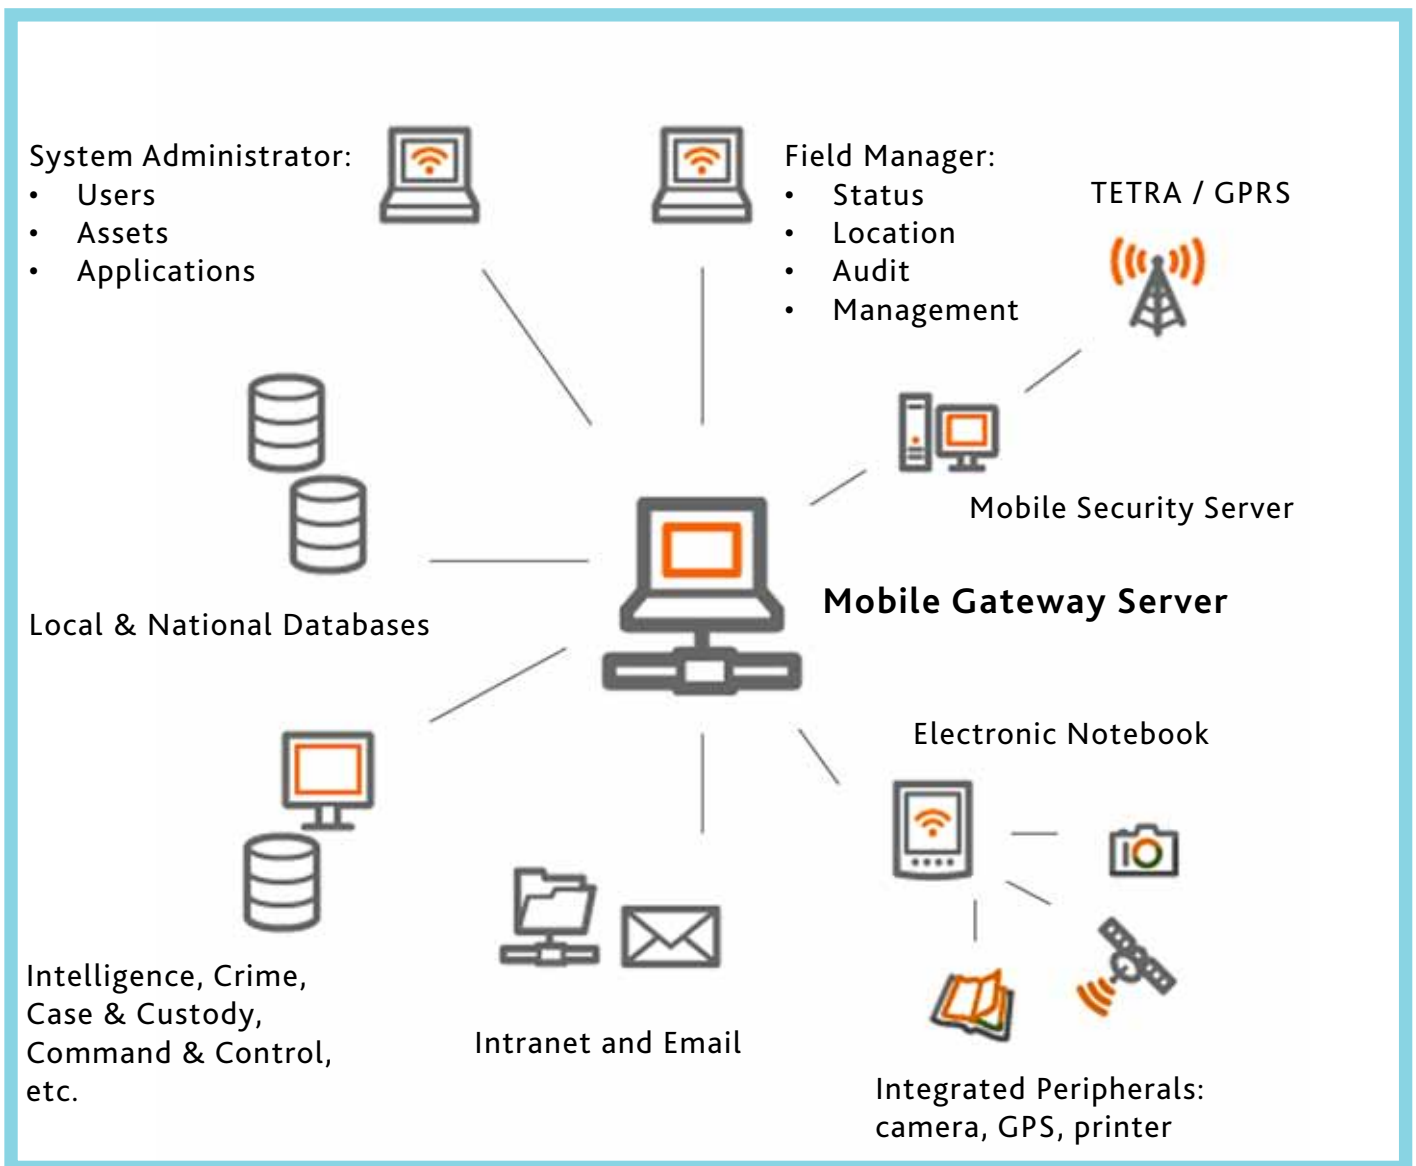

Mobaq is flexible and adaptable and can be localised to any language or geography.

Features include:

- Hardware independence
- Designed for mobile
- Multi-system integration
- Industry-standard encryption
- Single front end
- Roles and permissions
- Sandboxed application
- Data synching

Benefits include:

- Cashable and ongoing savings
- Improved service to public
- Modernisation
- Increased safety, productivity and capability
- Simplified outsourcing
- Immediate visibility of important information

Effective mobilisation of police business processes.

Clarity

Productivity

Effectiveness

Security
